35 YEARS IN THE UV CURING INDUSTRY

Benford UV lamps are the #1 choice for printers and industrial specialists seeking the most reliable, highest quality UV lamp solution on the market.

Benford UV has been in the UV curing business for over 35 years, we have been manufacturing our own UV lamps for our own UV curing systems, but with the closure of Primarc, we had the opportunity to expand our UV lamp manufacturing capabilities.

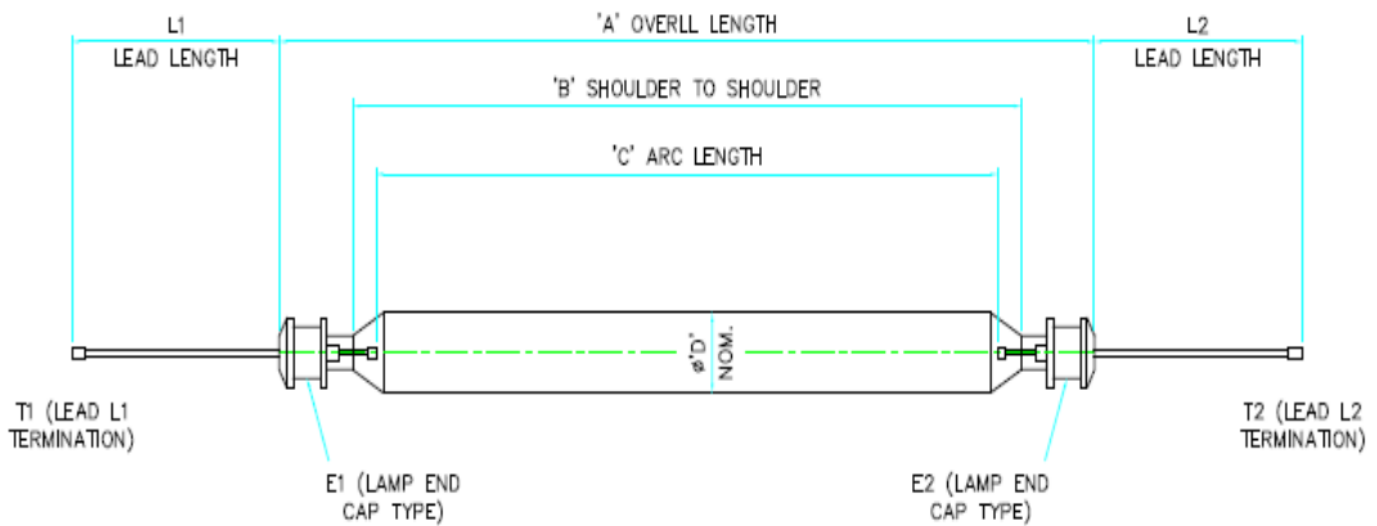

At Benford UV Lamps, our production and sales teams collaborate closely to make sure you get the exact lamp you need.

Ultraviolet Lamps

Medium pressure UV lamps are hand made from high quality quartz tube, electrical electrodes, cable, gas and a very small dose of mercury. It is very important that the dose of mercury is correct. If its not, the lamp will not work properly.

Benford UV lamps are handmade, in the UK, by technicians with many years of experience.

We manufacture the lamps that work best with our ultraviolet curing systems

How Do I Order a UV Lamp?

At Benford UV Lamps, our production and sales teams collaborate closely to make sure you get the exact lamp you need.

In the first instance, please send us the lamp number from the manufacturer, we have a large database and it may be one we have the specification for already. If we do not have the specification, then please go to our website and download the lamp identification form and fill it in with as much information as possible, a few photos of the lamp will also help.
